Solutions

Alsons Technology

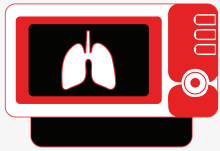

Alsons Technology Pvt. Ltd. is the group's specialized arm focused on advanced medical and technological solutions. ATL is dedicated to improving healthcare delivery through cutting edge engineering, precision manufacturing, and strategic global partnerships.

Medical Focus

We aim to bridge the gap between technology and healthcare by providing reliable, efficient, and innovative medical equipment tailored to modern clinical needs.

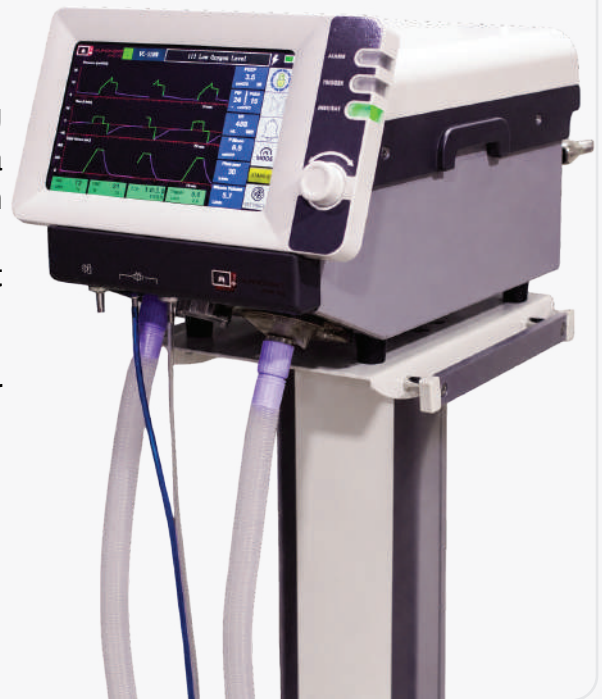

Precision Technology for Better Care.

ALNNOVENT AVB-100

Every Breath Counts

Introducing the Alsons Group's Electro-Mechanical ICU Ventilator, our Lifesaving Solution for Modern ICUs with a total of nine versatile modes of operation, including seven invasive and two non-invasive options. Proudly designed, developed, and manufactured in Pakistan, the AlnoVent AVB-100 offers a comprehensive range of monitoring parameters and modes at an incredibly competitive cost. Trust us to deliver top-notch critical care support for your patients. The AlnoVent AVB-100 is designed for adult patients weighing between 30 kgs to 200 kgs.

GE HealthCare

Global Technology, Local Partnership.

Together with GE HealthCare, a global leader in medical technology and digital solutions, we are shaping the future of healthcare - today.

Handheld

Vscan Air™ SL

Simple. Smart.
Superb Imaging.

Premium image quality in a sleek handheld device.

- High-quality imaging
- Dual probe connectivity
- Sector probe for cardiac scans
- Linear transducer for vascular, MSK, lungs scans

Vscan Air™ CL

Cordless. Lightweight.
Clinical Confidence.

A truly pocket-sized ultrasound that goes where you go.

- Wireless & compact
- Dual probe connectivity
- Convex transducer for OB/GYN scans
- Linear transducer for vascular, MSK, & lungs scans

Portable

Versana Active™

Performance on the move.

A versatile, portable system that delivers exceptional image quality across a wide range of clinical applications.

- Sensitive B-Flow™ and B-Flow to analyze blood flow
- CrossXBeam™ for clear structure borders
- Smart clinical applications for thyroid, & bladder
- Portable & advanced cart options

Trolley Mount

Versana Essential™

Essential design.
Essential by value.

Reliable performance and easy-of-use for everyday imaging.

- Whizz dynamic image tuning
- SonoBiometry for quick BDP, HC, FL and HL fetal measurements.
- Excellent image quality
- Intuitive workflow

Versana Balance™

Balanced performance.
Smart productivity.

Advanced capabilities with smart tools for enhanced efficiency.

- Multi-gesture touch panel
- Auto IMT & Auto Bladder
- Advanced connectivity
- Supports Auto Ejection Fraction and stress echo

Versana Premier™

Premium performance.
Elevated care.

High-end features and powerful imaging for demanding clinicians.

- Scan Assistant, MSK-enabled Scan Coach & Voice Comments
- Assess liver, thyroid & breast nodules with LI-RADS®, TI-RADS® & BI-RADS®
- Power doppler imaging
- Caption Ai tool

Versana Lotus™

Redefining simplicity.
Elevating care.

A next generation ultrasound system designed for modern clinical environments.

- Scan Assistant, MSK-enabled Scan Coach & Voice Comments
- Assess liver, thyroid & breast nodules with LI-RADS®, TI-RADS® & BI-RADS®
- Power doppler imaging
- Caption Ai tool

Cardiovascular/Echo

Vivid T8

Clarity that drives confident decisions.

Premium cardiovascular ultrasound system with outstanding image quality and advanced tools.

- Excellent 2D imaging
- Advanced quantification
- Stress & strain imaging
- Built for productivity

Vivid T9

The next dimension in cardiac care.

Powerful performance combined with intelligent automation for superior clinical outcomes.

- Advanced adult and Peds TEE
- Ai-enabled workflow
- Exceptional detail
- Ultimate performance
